

# Senseair Salus

## User-friendly tool for easy service

Senseair Salus is a dedicated test and diagnostic tool for the handsets of Senseair alcohol screening products. It performs comprehensive health checks on the alcohol sensor to ensure compliance with the stringent requirements for accurate alcohol level measurements.

With Senseair Salus, service and maintenance can be conveniently carried out at your premises. The program provides a clear, step-by-step guide through the entire service process in an intuitive and user-friendly manner. If any checks fail, recommended corrective actions are presented. Upon completion, a detailed service report is generated and automatically emailed to the operator.

## Standard specification

Article number	00-0-0111
Operating conditions	-10–70 °C
Power supply	12 VDC
Peak power consumption	120 W
Service interval	12 months
Dimensions	349x234x85 mm
Weight	2.2 kg
Storage conditions	-10–70 °C
User interface	Application based interface
Installation	Connected to laptop and Senseair alcohol screener device

## Key benefits

- Ensures correct measurements
- User-friendly operation
- Provides access to latest software updates
